DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Antram. Antram teaches apparatus as recited including semi-cylindrical valve bodies 7,8 having flanges 9,10 between which a semi-circular sleeve 26 is operated by fluid through port 17 to open and close the valve. Note also side flanges 12,13. The method steps of claims 9-10 would be inherent of Antram in its operation as disclosed.

Allowable Subject Matter

Claims 5, 7 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

B-G are further teachings including gasket use of valve structure, single flexible membrane and valve design.
